Hexol® - regional expansion in Africa, Middle East and Asia, through a manufacturing partnership in UAE!

A 2023 full of opportunities!

The last 2 years represented real challenges, caused by the Covid-19 pandemic and the conflict situation in Ukraine, which brought blockages in all sectors and the entire oil industry was on alert.

Due to the fact that it was necessary to break into this intense market battle and to overcome this moment, **Hexol®** Management considered the time favorable for an expansion in the region that connects the countries of Africa, the Middle East and Asia, even more so as the year 2023 represents the 25th year of existence of the **Hexol®** brand.

*"We are proud to say that through an exceptional manufacturing partnership with one of the most important blending companies in the United Arab Emirates, **Hexol®** products will now also be available in AMEA countries (Africa, Middle East, Asia). This expansion represents for **Hexol®** the great opportunity to open new international markets for **Hexol®** products"* - states Mr. Daniel Condratov - President of Hexol®.
