Hexol® - Continuous profit in 2022

Consolidating and expanding the sales area is an essential step in business development

Even if the last 2 years represented real challenges for the lubricants industry, for **Hexol®** the year 2022 ends respecting the ascending trend of the last years. Overlooking things, in 2022 there was an increase in sales of 18.83% compared to 2021, sales on the national market increased by 37.02% and the ones from exports by 20.05%.

*"The ascending trend of sales represents a validation of our strategic expansion goals and also proof of the potential of the products in the **Hexol®** portfolio. We continue to stay focus on the strategy of international expansion and the establishment of partnerships with collaborators from new markets, as well as on increasing the market in the countries where we are present by developing new products that meet the requirements of the modern market"* – states Mr. Daniel Condratov – **Hexol®** President.
